By: Chris McDonough

Retired: Oceanside Police Department

How suspects are choosing victims

Predators are becoming smarter and intellectual on how they select a victim.

People are being selected as a target now, not at random

Suspectology – Type of predator

- White collar predator – Smarter predator, high IQ
- Background of predator: Anger, alcohol and drug abuse, childhood issues, theft, arrested of arson, drugs, bad friends, goth, pornography. Addictive personality. Instability and fantasy. Dark web opens to open road to fuel addictive behavior and leads to issues.
- Understood what he was doing, was clearly thinking, goal oriented and knew what he was doing. He did not want to get caught, picked certain areas for a reason. Looked for easiest victim.
- Predators are not going to streets anymore for targets but online

Victimology – What does the victim look like to the predator
